

Aslam Basha

Network, Security & Systems Engineer Bengaluru, Karnataka 560037 | 7760115936 |
Aslambasha557@gmail.com | [linkedin.com/in/aslam-basha5936](https://www.linkedin.com/in/aslam-basha5936) |

PROFESSIONAL SUMMARY Results-driven Network & Security Engineer with 10+ years of experience designing, administering, and securing enterprise campus and data center networks. Expert in SD-WAN architecture, high-availability environments, and endpoint security deployment. Adept at bridging infrastructure management with proactive security operations, including threat hunting, stealth reconnaissance, and ethical hacking. Proven track record of supporting mission-critical operations, providing master-level escalation support, and ensuring robust defense postures for large-scale user environments.

TECHNICAL SKILLS

- **Networking Protocols & Routing:** LAN/WAN Design, IP Addressing, Subnetting, VLAN, Inter-VLAN Routing, STP, VTP, EtherChannel, ACL, HSRP, RIP, OSPF, BGP, Cisco Meraki SD-WAN, Extreme Networks
- **Security & Threat Management:** Next-Gen Firewalls (FortiGate, Palo Alto, Sophos), CrowdStrike EDR, SentinelOne, Vulnerability Scanning, SOC Operations, System Hardening, Ethical Hacking
- **Systems Administration:** Windows Server/Client, Active Directory, DNS, DHCP, GPO, NetApp NAS, Linux (Ubuntu, Kali Linux), macOS
- **Virtualization & Hardware:** VMware (Provisioning, Snapshots), Data Center Deployment, Server Rack Installation, Structured Cabling, IT Asset Management
- **Development & Automation:** Python, React, Node.js, Next.js, Retrieval-Augmented Generation (RAG) Architecture, Custom Dashboard Development

PROFESSIONAL EXPERIENCE

Museum of Art and Photography (MAP) | Bengaluru, India *Network & Security Engineer* | Jun 2023 – Present

- Manage highly available enterprise LAN/WAN infrastructure across 3 sites, maintaining 99.9% network uptime for mission-critical operations.
- Architect and optimize Cisco Meraki SD-WAN environments, successfully reducing network latency by 75% through Auto-VPN, WAN failover, traffic shaping, and ISP redundancy protocols.
- Administer enterprise-grade endpoint security platforms (CrowdStrike EDR, SentinelOne, Zoho Endpoint Central), actively investigating and mitigating 500+ potential security threats monthly.
- Conduct SOC-aligned operations and incident triage, reducing average security response time (MTTR) by 45% while maintaining 100% audit-ready compliance documentation.
- Developed a self-hosted, full-stack IT asset inventory and security dashboard (React/Node.js) that ingests real-time telemetry and leverages automated vulnerability scanning to generate proactive, offensive-security-based remediation strategies.

- Deployed a custom Retrieval-Augmented Generation (RAG) AI system utilizing Python, completely automating policy and data queries and reducing helpdesk ticket volume by 35%.
- Automated network infrastructure resilience by scripting auto-triggered backups for all core and edge switch configurations, guaranteeing 100% disaster recovery readiness.
- Engineered a unified communication interface for automated bulk email distribution, streamlining targeted messaging for 5,000+ unique users and external museum visitors.
- Deploy and maintain Extreme Networks switches and Wireless LAN Controllers (WLC) to guarantee seamless, high-density wireless connectivity for 1,200+ daily campus and guest devices.
- Manage robust system infrastructure encompassing 100TB+ NetApp NAS storage (optimized for high-resolution digital art archives), Windows Server environments, Active Directory, and Group Policy Objects (GPO).

Sunleo Power Networks | Bengaluru, India *Network Engineer* | Dec 2021 – Jun 2023

- Provided Tier 2 and master-level Tier 3 escalation support for a growing infrastructure of 550+ enterprise users, achieving a 98% SLA compliance rate.
- Managed multi-location LAN, WAN, and dedicated Internet connectivity across 12 distributed sites, ensuring continuous operational stability.
- Configured and maintained complex Cisco Meraki SD-WAN deployments, optimizing 150+ firewall policies and NAT rules to strengthen perimeter defenses.

MRO-TEK (Umiya Buildcon Ltd) | Bengaluru, India *Network Engineer* | Nov 2019 – Sept 2021

- Configured, optimized, and maintained Cisco routing and switching infrastructure, supporting a continuous operational environment for 350+ users.
- Designed and supported comprehensive data center networking, managing the installation of 8 server racks, core switch configurations, and structured cabling standards.
- Administered secure VPN connectivity for remote access, actively resolving 120+ complex firewall routing anomalies with zero critical downtime.

Shine Management Service | Bengaluru, India *Network Engineer* | Oct 2017 – Oct 2019

- Executed device staging, base configuration, and rigorous firmware validation for 500+ network devices within a high-volume system integration environment.
- Supported Factory Acceptance Testing (FAT) and Proof of Concept (POC) setups, preparing and validating golden configurations to ensure a 40% reduction in post-handover customer issues.

Exit10 Marketing Private Ltd | Bengaluru, India *IT Engineer* | Mar 2016 – Sept 2017

- Directed Active Directory administration and user domain management for 150 users, alongside maintaining 15 continuous web hosting platforms.
- Executed strategic IT infrastructure planning, successfully deploying server racks, 5,000+ meters of network cabling, and edge switches ahead of schedule.

- Provided enterprise-level desktop support, resolving an average of 45+ technical tickets weekly and configuring secure email communications.
- Executed fleet-wide upgrades of Windows operating systems for 300+ machines to ensure security compliance and performance efficiency.

PROJECTS & SECURITY RESEARCH

- **Independent Security Researcher:** Actively participate in bug bounty programs (including GetYourGuide), conducting vulnerability scanning, manual validation of Content Security Policy (CSP) vulnerabilities, and responsible disclosure.
- **Universal Stealth Bug Bounty Pipeline:** Engineered a customized offensive security environment utilizing Kali Linux on Windows 11 (WSL) for stealth reconnaissance and continuous network vulnerability testing.
- **Web-Based Meeting Room Booking System:** Designed and developed a complete full-stack scheduling application utilizing modern web frameworks (React, Node.js, Next.js) to support 50–60 users and optimize office space utilization.

EDUCATION

- **Bachelor of Computer Applications (BCA)** | KSOU Mysore | 2015
- **Pre-University (Intermediate)** | SIR M.V. Visvesvaraya PU College | 2011
- **S.S.L.C** | Board of Secondary Education of Karnataka | 2009
